7. Maintenance
  - a. Database Size
    - i. Trial SDR records are causing databases to grow dramatically in size. After marking your final files as having been successfully submitted, you must remove your trial SDR runs so that the backup and performance of Artena is maintained.
  - b. Preferences defaulting to a Subject Area
    - i. When logging into Artena for the first time the default subject area will be the first in the list. To default the Preferences Subject Area to 'Not Applicable', update the display order in the Lookup\_SubjectArea.

Direct queries to [helpdesk@adaptit.co.nz](mailto:helpdesk@adaptit.co.nz), quote the defect number as a reference.

## 3. New Functionality

---

### **Artena Student Portal (ArtenaSP)**

ArtenaSP will enhance the student's experience by allowing online access to information, whether submitting or receiving. To the tertiary education organisation, this translates into cost savings as a result of simpler processing. Organisations will not need to manually enter the information submitted into Artena or process requests for information that is already available to view online.

Artena SP links the following with a data transfer process:

- a front end for students
- backend setup and administration within Artena

The ArtenaSP application utilises an MS SQL database separate from that for Artena and with the user interface using HTML5. This will ensure the optimal performance of both databases, allow for better security, and provide flexibility for future changes.

### **Alumni**

Functionality has been added to the Marketing Dashboard to generate person sets that allow the user to more effectively target specific alumni.
